

COATING SERVICES

Altus specializes in all types of technical corrosion prevention solutions for both shop and field applications. All surface preparation and protective coating applications are performed according to strict internal quality standards. Our team of professionals have both the knowledge and resources to protect tank farms, pipelines, facilities and infrastructure from the effects of corrosion.

Field Services

Altus specializes in all types of field coatings including industrial structures and surfaces, tanks, pipe, structural steel and floors. Field Constructed Tanks can be coated internally and externally according to the customers' specifications. Our high capacity mobile units, equipped for plural and regular coating applications, make us one of the most versatile coating companies in Western Canada.

Services include:

- Industrial Floor Coating
- External Tank Painting
- Internal Tank Lining
- Structural Steel
- Industrial Plant Coating
- Pipe and Pipeline Coating and Lining
- Fireproofing
- Pipe Insulation
- Pipeline Rehabilitation Coating
- Girthweld Coating

Facilities

Within our four facilities, we have over 70,000 square feet of dedicated paint and surface preparation bays and over 50 acres of yard space. The facilities are climate controlled and designed to complete projects year round.

Services Include:

- Tank and Vessel lining
- Spool and Pipe coating
- Equipment Painting
- Structural Steel
- Foam Insulation
- Internal Pipe Lining
- Fireproofing

Project Management

Altus has an experienced project management team that will ensure that all project requirements are met on time and performed safely and efficiently. Projects are managed with strict quality standards enforced by our NACE certified staff.
