

# INDUSTRIAL COATINGS

Altus specializes in all types of corrosion prevention solutions. Our facilities are equipped with the portable equipment and manpower to deliver top quality coating services for a variety of uses. We have the knowledge and resources to provide expert sandblasting, painting and internal coating services for field tanks, piping, and vessels for gas plants, refineries and heavy oil plants. The combined experience of the Altus team ensures every job is completed effectively and efficiently.

## Field Services

Altus specializes in all types of field coatings including industrial structures and surfaces, tanks, pipe, structural steel and floors. Field Constructed Tanks can be sandblasted and coated internally and externally according to the customers specifications. Our high capacity mobile units that are equipped for plural and regular coating applications make us one of the most versatile coating companies in Western Canada.

Services include:

- Industrial Floor Coating
- External Tank Coating
- Internal Tank Coating
- Structural Steel
- Industrial Plant Coating
- Pipe and Pipeline Coating

## Facilities

Altus has over 70,000 square feet of dedicated paint and blast bays within our four facilities and over 50 acres of yard space. The facilities are climate controlled and are designed to be able to complete projects year round.

Services Include:

- Tank and vessel lining
- Spool and pipe coating
- Equipment Painting
- Structural Steel
- Foam Insulation
- Internal Piping

## Project Management

Altus has an experienced project management team that will ensure that all project requirements are met on time and performed safely and efficiently. Projects are managed and safety and quality standards are maintained by our NACE certified staff.
